KRISHNAI: AI-Powered Mental Wellness Chatbot

KRISHNAI is an AI-powered mental wellness chatbot designed to provide emotional support, self-reflection guidance, stress management assistance, and personal growth insights. The system combines modern Artificial Intelligence techniques with the timeless wisdom of the Bhagavad Gita to deliver meaningful, context-aware, and supportive conversations.

Problem Statement

Many students and young professionals experience stress, anxiety, overthinking, lack of motivation, and uncertainty. Access to mental wellness resources is often limited, expensive, or unavailable when needed. KRISHNAI aims to provide an accessible first-line support system.

Objectives

- Provide emotional support and guidance. - Encourage self-reflection and positive thinking. - Deliver personalized responses using AI. - Leverage Bhagavad Gita teachings for practical life situations. - Promote mental well-being and personal development.

Technology Stack

Frontend: Streamlit/Web Interface Backend: Python AI Components: Large Language Model (LLM), Embeddings Vector Database: FAISS Architecture: Retrieval-Augmented Generation (RAG) Knowledge Base: Bhagavad Gita verses, translations, and explanations

System Architecture

User Query → Embedding Model → FAISS Retrieval → Relevant Gita Verses → LLM Response Generation → User-Friendly Wellness Guidance

Key Features

- Mental wellness support - Stress and anxiety guidance - Motivation and self-improvement assistance - Context-aware conversations - RAG-based knowledge retrieval - Scripture-grounded responses - User-friendly chatbot interface

Use Cases

Students facing academic pressure, individuals dealing with stress or uncertainty, users seeking motivation, and people interested in self-improvement and reflective learning.

Expected Impact

KRISHNAI aims to make mental wellness guidance more accessible while encouraging positive habits, resilience, self-awareness, and informed decision-making.

Limitations & Ethics

KRISHNAI is a mental wellness companion and educational tool. It does not replace licensed psychologists, psychiatrists, therapists, or emergency mental health services.

Project Highlights

• AI + Mental Wellness Integration
• RAG-Based Knowledge Retrieval
• Bhagavad Gita Inspired Guidance
• Scalable and Accessible Solution
• Educational and Social Impact Focus
